Website: <http://catyellow.net/>

I'm Ukrainian but I live in Krakow (Poland) since 2014 and I plan to stay here on permanent basics. I live there with my lovely wife and my 2 great kids. My main background for a recent years is MySQL DEV/DBA engineer but I'm also participating in wider range of tasks which could be likely called as DevOps task. My career highlight is: "Pasja to za mało" (polish), because our passion doesn't always guarantee that our personal and professional requirements will be met. Everyone is working to build his own career, but this world is not whole about money, so proper self-balancing and self-control are very important.

Skills

Programming Languages, Technologies & Tools

- Linux: RedHat/Debian
- Firewalls: iptables, ufw
- Load balancing/High-availability: HAProxy, KeepAlived
- Monitoring/Graphing: PMM, Nagios, Grafana, Zabbix
